

CAP DETECTION AND REJECTION SYSTEM

**Quality
Assurance
with
Maximum
Operating
Efficiency**

- Ensure product integrity with improved operation and reduced labor
- Supports various cap sizes and shapes with speeds up to 80 CPM
- Easy integration with existing line with minimal space requirements
- All stainless steel construction
- 3 to 4 month Return-On-Investment

Standard Features:

- All industry standard controls
- All stainless steel construction with wash-down rating
- Compatible with glass, plastic or metal containers with round, square or rectangular shapes; up to 2-½ Gallon
- Missing cap, loose cap and cocked cap “all-in-one” detection for plastic or metal caps
- Works with most continuous thread caps, snap caps and press-in-place caps

Options:

- Control kits available as stand-alone or integrated into current Pack West PLC and HMI
- Available as cap reject system only or with optional conveyor and rotary accumulation table

Integrated Solutions:

In addition to inline capping, cap sorting and conveying systems, Pack West Machinery also offers integrated liquid filling solutions with conveyors and complete line controls. For higher speed applications, Pacific Packaging Machinery provides integrated rotary capping and filling solutions. Call your sales representative for additional details.
